

Identity Guardian: Comprehensive Protection for High-Risk Deployments

Why Identity Guardian?

The **Identity Guardian platform**, developed by FGI, addresses the critical need for a standardized system in **collecting and safeguarding identity data**.

Tailored to meet the distinct needs of both civilian employers and military commands, this solution ensures the seamless and secure management of sensitive information.

By utilizing our services, clients can find assurance in having a **dependable source** for legally verifying identity if the need arises.

Families and employers, can rest assured that they have taken adequate steps to **preserve identity information** for those deployed or traveling to higher-risk areas.

How does Identity Guardian work?

Register

Our team is ready to assist you and find the best solution. Contact us today to start the registration process.

Collect

Identity Guardian collects antemortem data, including medical records, photos, and biometrics. This aids in identification during accidents or disasters. The securely stored data utilizes advanced encryption and accredited laboratories.

Safeguard

Identity Guardian ensures secure, accessible data, keeping personal information confidential and limiting access to authorized individuals in high-risk environments.

Benefits Across Civilian and Military Applications

Legal and Ethical Compliance

Identity Guardian supports organizations in meeting their legal and ethical obligations, protecting the privacy and dignity of individuals by maintaining their information securely.

Rapid and Reliable Data Access

In emergencies, our platform ensures quick access to accurate information, improving response times and operational efficiency.

Peace of Mind for Families and Employers

Secure identity management provides reassurance to families and employers, preparing them for high-risk deployments.
